## Types of Classes:

Vorlesung	lecture course	<i>Lecture courses</i> serve to provide overviews over a subject matter in support of more detailed topics of regular classes. Some lectures end with an in-class exam.
Proseminar	undergraduate seminar	<i>Proseminars</i> are classes with introductory character. Regular attendance is mandatory. They usually require an independent academic effort on the part of the student, such as a research term paper.
(Haupt)-Seminar	intermediate-level seminar	<i>Seminars</i> are more advanced classes which require certain prerequisites. They also require the writing of a substantial term paper.
Übung	course	<i>Übungen</i> are practically oriented classes, often concluding with in-class exams.
Praktikum	practical or laboratory course	These are complementary courses to theoretical classes. In the natural sciences, they are laboratory courses. Credit usually depends on continuous and successful participation - in the natural sciences the successful completion of a series of experiments.
Oberseminar/ Kolloquium	advanced graduate course	<i>Oberseminars</i> are classes for advanced graduate students who are preparing for their final exams. Credit may be based on a major oral exam and/or a major research paper.

The fact that no credits are given for lectures and that certain credits are given on a pass/fail basis does **not** mean that these courses are voluntary lessons. Such classes are mandatory parts of a regular course of studies, and are as much a part of the curriculum requirements for students as courses graded with "regular" number grades.

Please note that this is a selective list of course types which are most applicable to exchange students. If you have further questions, please don't hesitate to ask!
